**Lindsay Upperman PhD: 717-816-0706**  
(Red Angus Representative)

## **Lodging:**

**Brown's Hill Tavern & Motel**  
717 Browns Hill Road  
Mill Hall, PA 17751  
(570) 726-3090

**Comfort Inn**  
31 Hospitality Lane  
Mill Hall, PA 17751  
(570) 726-4901

**Hampton Inn & Suites**  
24 Hospitality Lane  
Mill Hall, PA 17751  
(570) 726-3939

## **Visit Our Website:**

**[www.chappellredangus.com](http://www.chappellredangus.com)**

**View our website for additional pictures, videos & supplemental data information on all animals.**

## **Special Note:**

All animals have been ultrasounded for carcass data. All bulls have been semen tested. All animals have also been GGP-LD/50K tested. Supplemental data sheets will be provided sale day for any missing or updated information. Updates will also be posted on [www.chappellredangus.com](http://www.chappellredangus.com) as they become available.

All delivery in PA and surrounding states will be free of charge. Also, Dan is planning a western run to at least Iowa and possibly Oneal, Nebraska. If you are in the midwest and can meet us on I-80, that would be great. Please make tentative arrangements before the sale. Any animals taken home sale day will receive \$100 per head discount. We recommend purchasing life insurance immediately after your purchase.

## **For Cattle Insurance**

**Contact: Jame Krieger by text or phone  
on sale day: (812)208-0956**

## **Red Angus Feeder Calf Certification Program Tags**

- Traceability to at least 50% Red Angus Bloodlines
- Source Verified to the Ranch of Origin
- Group Age Verified

Friends and Fellow Cattlemen,

First off, we would like to thank all our past customers over the last 9 years for buying our cattle through the Keystone Elite sale, which has always been hosted at our farm. Your support is greatly appreciated, and we value your trust in our genetics. However, all good things must come to an end and we have decided not to participate in the Keystone Elite this year. We have decided to cut back on our cattle numbers in order to pursue some of our other passions in life (fly fishing, archery hunting, and other outdoor activities) because, well, life is just too short!

We would like to thank Jim Jones and Swank Farm for a great partnership over the last 9 years, you will not find a better person and a more devoted partner than Jim. We would also like to thank Jim's right hand man "Disco" Donny Ritenour. A special thanks to Craig Davis and Steve Harris of Wrights Mills Farm, who helped provide us with enough animals to have an auction over the last 9 years. Having said all that, the Keystone Elite Sale still lives and will continue as a joint sale with Swank Farm and C. Davis Farms on its normal date.

We now would like to welcome you to the Chappell Red Angus annual bull & female sale! Our mission is to provide breed leading, PROVEN genetics to our customers. Our genetics are PROVEN from years of submitting ALL the data possible to the RAAA. This includes twelve years of reporting ultrasound carcass data, GGP genomic enhanced EPDs, birth weights, weaning weights and yearling weights. By submitting all this data, our cattle either excel or fail, allowing us to choose the genetics that are working the best. Our accuracies on our yearling animals are higher than most cattle being sold in the US because we have been submitting the data for years. Please compare the data and accuracies on our cattle to other cattle you are considering buying.

By keeping our cow numbers low, we are able to do more embryo work to bring you the highest quality genetics possible. This year, we were able to bring in cattle from a few top-notch cooperators to bring you the best cattle they have to offer out of over 300 mother cows. All sale animals have been raised at our farm from weaning to yearling. All the bulls have undergone and passed an extensive Breeding Soundness Exam (BSE). Most of the bulls are eligible for the PA Bull Credit Program for our PA customers.

While this is a small group of cattle we are selling, we feel this is the best group of heifers and bulls we have ever sold to date. We have added foot scoring to the list of data we are offering, as we feel this data is important when making your cattle selections.

We would like to personally invite you to come by for a visit and evaluate the cattle anytime. We will have all the animals penned on Friday before the sale. We will have dinner around 5pm on Friday, March 1st. Lunch will be provided at noon on Saturday with the sale starting at 1pm (EST). The sale videos will be available for viewing 1-2 weeks prior to the sale on our website as well as on DV Auction. If you are unable to attend the sale, the sale will be broadcast live via DV Auction. We truly look forward to seeing you on sale day, whether you intend to bid, buy or just come by to visit!

Best Regards,  
Dan & Erica Chappell

Attention PA customers: Most of these bulls qualify for the PA Bull Credit Program, which qualifies you for a \$1,000 credit towards your bull purchase. For more information on the program, visit <https://www.beefexcellence.com/bull-credit-program>. Look for the keystone symbol to identify bulls that qualify.

*A special thanks to our cooperators for entrusting us with some of your best genetics to raise and develop from weaning to yearling.*

**Lot 5:** CHAPP-MPKE Yukon 301 is the only HXC Dawson 7003E sired bull in the sale. With Dawson now deceased, this may be your last chance at a Dawson sired herd bull. His MARB EPD is 0.94,

ranking him in the top 1% of the breed. This carcass data is real; his dam, Chappell Tamara E354, scanned off the charts with an 8.16 IMF (163 ratio) and a 12.27 REA (117 ratio). He is a complete herd bull package with a low birth weight of 73lb to high growth, carcass and maternal values. Dam's MPPA is 105.

## Lot 6: 7 EPD's in the Top 10%

**Lot 6:** Chappell Skyline L482 comes from the Molly/Liberty cow family on the bottom side, which has produced some of the best genetics to ever sell at Chappell Red Angus. We hate to call him a heifer bull, but with a 62lb BW, why not? He

is heavily muscled, dark red and offers growth with a top 2% ADG. He is way more than just a heifer bull with extra growth and top carcass traits to match.

## Lot 7: MILK in the Top 3%

# TERMS & CONDITIONS

1. Terms of the sale are check or cash settlement. Every animal will be sold to the highest bidder. All settlements will be made with the clerks of the sale immediately following the conclusion of the sale and before any cattle will be released from the sale facility.
2. The auctioneer will settle any disputes as to bids, and his decision on such matters shall be final.
3. Any announcements from the seller on sale day will take precedence over printed material.
4. Health certificates will be furnished for shipment anywhere in the U.S.
5. A certificate of registry and transfer will be furnished for each animal sold, after settlement has been made.
6. Each animal becomes the risk of the purchaser as soon as it is sold.
7. All bulls have been evaluated and are guaranteed to be breeders.
8. All animals are guaranteed breeders by sellers. Any animal that has not proven itself as a breeder within six months after the date of sale, if in healthy condition, may be returned to seller at buyer's expense. The seller reserves the privilege of trying, for a period of six months, to prove the animal is a breeder. The seller, at his option, may either replace the animal with another of equal value or grant the buyer a credit for use on any cattle marketed seller in full settlement and transaction of all claims. Yearling bulls shall be guaranteed breeders for no more than 25 females. All animals are guaranteed to be breeders, with the exception of calves that are sold in cow/calf pairs.
9. Neither the owners, sale managers, clerks, nor anyone connected with the sale assumes responsibility, legal or otherwise, for damages of any kind. Any person attending the sale does so at his own risk.
10. The above terms and conditions shall constitute a contract between the buyer and seller of each animal sold.

## Understanding EPD's as a selection tool.

**Breed Average for Non Parents Under 2 Yrs. of Age-**  
**Breed Average for Proven & Opportunity Sires-**

ProS	HB	GM	CED	BW	WW	YW	ADG	DMI	MILK	ME	HPG	CEM	STAY	MARB	YG	CW	REA	FAT
92	55	37	13	-1.8	60	97	0.23	1.46	26	3	11	7	15	0.41	0.07	23	0.12	0.02
89	53	35	13	-1.8	62	100	0.23	1.51	25	4	12	7	15	0.41	0.07	23	0.11	0.02

**Profitability and Sustainability (ProS):** all-purpose index that predicts average economic differences in all segments in the beef supply chain. This index is a combination of the breeding objectives modeled in the HerdBuilder and GridMaster selection indexes. In this index, replacement heifers are retained from within the herd and all remaining progeny are fed out to slaughter and sold on a quality-based grid. Traits included in this index include calving ease, growth, HPG, STAY, Mature Weight, Dry Matter Intake and carcass traits. The resulting index is expressed in dollars per head born (Index/High Value).

**HerdBuilder Index (HB):** An index used to estimate difference in profitability for the sustainability of the cowherd. This index was created on the assumption that an operation raises its own replacement females and terminally markets the remainder of the calf crop on a quality based grid. Given that replacement heifers are retained, primary influence is placed on maternal traits such as Stay, HPG, and CE. MARB, YG and growth EPDs also impact this index, but to a lesser degree.

**GridMaster (GM):** An index used to estimate differences in profitability for those whose primary goal is to maximize profitability in the feedyard and on the rail. This index was created on the assumption that an operation markets all of the calf crop terminally on a quality based grid with no replacement females being raised. MARB, YG and growth EPDs are traits of primary importance in the index.

**Calving Ease Direct (CED):** Predicts the probability of calves being born unassisted from two year-old heifers. Selecting on actual birth weight is flawed; it is influenced by non-genetic factors such as nutrition and weather. While the BW EPD removes these non-genetic factors, the CED EPD is the best predictor of calving ease. CED includes variation in BW plus other influential genetic factors such as gestation length, calf shape, etc. The higher the CED EPD, the less calving difficulty.

**Birth Weight (BW):** Predicts the difference, in pounds, for birth weight, and is also used in the calculation of the CED EPD.

**Weaning Weight (WW):** Predicts the difference, in pounds, for weaning weight (adjusted to age of dam and a standard 205 days of age). This is an indicator of growth from birth to yearling.

**Yearling Weight (YW):** Predicts the expected difference, in pounds, for yearling weight (adjusted to 365 days of age). This is an indicator of growth from birth to yearling.

**Average Daily Gain (ADG):** Developed to more easily identify animals with favorable combinations of gain and intake. This will serve as a more intuitive measure of an animal's growth rate from weaning to a year of age.

**Dry Matter Intake (DMI):** Calculated using a multiple-trait model that includes DMI, On Test Average Daily Gain, Post Weaning Average Daily Gain and Weaning Weight.

**Milk:** Predicts the difference in maternal production of an individual animal's daughters as expressed by the weaning weight of their calves.

**Maintenance Energy (ME):** Predicts the differences in maintenance energy requirements of mature daughters of a bull. The lower the ME EPD, the less feed daughters require to maintain body condition.

**Heifer Pregnancy (HPG):** Predicts the probability of heifers conceiving to calve at two years of age.

**Calving Ease Maternal (CEM):** Predicts the probability of a given animal's daughters calving unassisted at two years of age.

**Stayability (STAY):** Predicts the probability of a bull's daughters remaining in the herd until at least six years of age. Females that don't stay in the herd that long are losing money, and they also contribute to higher rate of replacement females that the rancher can't cash crop.

**Marbling (Marb):** Predicts the difference for carcass marbling score as expressed in marbling score units. Higher marbling scores are positively correlated with higher carcass quality grades.

**Yield Grade (YG):** Marketing calves on a grid? Placing selection pressure on YG EPD will decrease the number of YG discounts on grid-marketed progeny.

**Carcass Weight (CW):** Selecting bulls with a high CW EPD will increase the weight of the hanging carcass, which directly impacts revenue.

**Rib Eye Area (REA):** Predicts difference of carcass Rib Eye Area between the 12th and 13th rib. Increase Rib Eye Area has a beneficial effect on Yield Grade which also includes Carcass Weight and Fat Thickness.

**12th Rib Fat Thickness (FAT):** Predicts difference for carcass fat depth over the 12th rib, as expressed in inches. Increases in fat thickness has a detrimental effect on Yield Grade.
