RAAA Representative

Special Note:

All animals have been ultrasounded for carcass data. All bulls have been semen tested. All open heifers have been brucellosis vaccinated. All animals have also been GGP-LD/50K tested. Retaining 50% semen interest in all yearling bulls. Supplemental data sheets will be provided sale day for any missing or updated information. Updates will also be posted on www.chappellredangus.com as they become available. NOTE on all ET calves: the GENOMICS on the birth weight and CED are more important than the actual birth weight as they all have surrogate mothers so you can't go by the actual birth weight on the calf.

All delivery in PA and surrounding states will be free of charge. Also, Dan is planning a western run to at least Iowa and possibly Oneal, Nebraska. If you are in the midwest and can meet us on I-80, that would be great. Please make tentative arrangements before the sale. Any animals taken home sale day will receive \$100 per head discount. We recommend purchasing life insurance immediately after your purchase.

Red Angus Feeder Calf Certification Program Tags

- Traceability to at least 50% Red Angus Bloodlines
- Source Verified to the Ranch of Origin
- Group Age Verified

Friends and Fellow Cattlemen,

We would like to welcome you once again to our 12th annual bull & female sale. We would like to thank all our customers and friends for your past support. All our success depends on your support of our program.

This is a tremendous set of bulls with a lot of diversity in sire groups to offer you. There is literally a bull for every need possible in this sale. You will notice several ET calves this year with multiple full brothers selling. This is what the future of this sale is going to look like. This sale will not get any bigger, but it will always keep getting better to the best of our ability. Study these bulls carefully, there are some bulls being offered that you can't buy anywhere else that are out of the best genetics possible.

This heifer offering is special and different from the past. You will see several ET calves offered out of our best genetics. You will also see heifers from Hillegas Red Angus mixed in the offering. Todd & Rich have helped us in every way possible to get ready for this sale. The truth is we couldn't have done it without them. We are also partners on some high-end females with Hillegas Red Angus that you will see offered in the sale.

You will notice no frame scores listed this year. However, we do have frame scores on all the animals. If you need that information, please call or text and we will be happy to provide it. We also eliminated the claw score from each animal. The feet on these animals are correct and we guarantee it. To the best of my ability, I am saying the feet/claw on all the animals offered in the sale are between a 5 and 6 claw shape. You can refer to the foot & leg chart listed in the catalog on page 3 for reference.

- All animals will be penned on Friday March 6th for you to view and visit with us. We will also be providing dinner and drinks on Friday evening starting at 5pm for everyone.
- Sale videos will be up by February 20th on our website and DV auction for you to view.
- You can bid in person, on the phone, on the internet with DV Auction or by proxy with Chappell Red Angus or DV Auction.

We have scattered the midwest with catalogs this year looking for new commercial customers. We want your business so please give us a try. We guarantee our bulls will work in your environment or we will make it right. Period. Our bulls & heifers have worked for customers from Florida to Maine to western Nebraska. They have also thrived in fescue areas as well. We do offer FREE DELIVERY TO CENTRAL POINTS and in most cases deliver ourselves so we can meet our customers and shake their hands.

Best Regards,
Dan & Erica Chappell

Attention PA customers: All bulls qualify for the PA Bull Credit Program, which qualifies you for a \$1,500 credit towards your bull purchase (minimum purchase price of \$4,000). For more information on the program, visit <https://www.beefexcellence.com/bull-credit-program> . Look for the keystone symbol to identify bulls that qualify.

A special thanks to our cooperators for entrusting us with some of your best genetics to raise and develop from weaning to yearling.

Lot 1: HRP Ruby 520-N5360 is owned by Hillegas Red Angus & Chappell Red Angus. She was our pick out of all the HanSine Ranch 2025 heifer calves. We spent 3 days sorting through 147 heifers to come up with this incredible heifer. We had 57 heifers picked from the list based on pedigrees and paperwork. After that it was all about phenotype. We feel we picked out the best phenotypical and structurally correct female they had. Arguably, of course. Basically, Erica told us which one was the best. LOL. As far as we know, she is the only RED

female of this mating in existence. Her pedigree is flawless. Her sire, Brown CRSB Confidence G1410, sired the highest selling bull ever in the Red Angus Breed, the \$400,000 PIE Hollywood 222. Her dam is the mother to PIE Quarterback 789, possibly the best bull ever in the breed. At a minimum Quarterback has changed the breed for phenotype & body structure in a good way. PIE Ruby 520-N5360's own performance record speaks for itself with a 781 WW and a 1099 YW. Her scan data is incredible. She has a 5.60 IMF with only a .27 BF and a 11.27 REA.

Her EPD profile is calving ease along with top notch growth traits. Her carcass traits are impeccable, and she proved that with her ultrasound data. Phenotypically, she is what we would want all our females to look like. She has a clean shoulder with good neck extension, is long bodied, wide topped with a nice square hip and plenty of guts and capacity. All combined into a very feminine look with excellent bone structure and feet.

Lot 2: What a way to start the sale! This is arguably the best bull in this year's offering. Everyone that visited this year has unanimously picked this bull as their favorite. Let's start with the sire, PIE Intensity 295, owned by HanSine Ranch, SD. This semen is not on the open market, so take advantage of this opportunity to purchase one of three sons in this sale. His dam, Chappell Liberty G404, produced the lot 1 flush opportunity last year that sold to Ron Gilliland of Davis, CA. G404 hails from our Liberty/Molly cow family that needs no introduction in this part of the world. Chappell Enforcer N502 boasts an impressive 11 categories in the top 10% of the breed with all 5 carcass traits in the top 9%. Dam's embryo package sired by Bieber Hard Drive Y120 sell as lot 31.

Lot 3: Chapp-Hill Icon N02ET is as rare and special as it gets. He is sired by the \$400,000 Pie Hollywood 222 and his dam, U2 Beauty 113Z, is one of the most sought-after females in the breed. PERIOD! U2 Beauty 113Z's bull progeny has averaged \$38,000 to date. But, I'm sure you can buy this one for a hell of a lot less in PA. LOL! This ET calf has excelled since birth in every way possible with his growth, top indexing scan data, cherry red color and feet as good as they get. Most of our customers are looking for one bull that can do everything and this bull can! From his 16 CED to high growth, he is heifer safe and cow ready. There is a full brother selling as lot 17.

Lot 4: Chappell Landman N506 blends moderate calving ease with top 1% growth and he proved it by having the highest YW in his contemporary group. He is clean cut, deep ribbed, soggy sided and docile as it gets. His dam, Chappell Marie J425, produced the lot 27 heifer in last year's sale that sold to Adam Glienke, IA. That heifer had a huge 13.42 REA. In the 2024 sale, she produced the high selling bull which went to Brian Glienke, IA. His maternal granddam produced the high selling bull in the first two sales we ever had, so this cow family flat out puts pounds on the ground. Selling embryos of this same mating as lot 30.

Lot 5:

Lot 5: Here we go, if you're looking for a cow bull, Chapp-Bryan 2501 is as good as you will find anywhere this year. He has the heaviest WW at 801, YW at 1428 and largest REA at 15.81 in the entire sale. He has 11 EPD categories in the top 24% of the breed and all the carcass traits are in the top 24%. The carcass is truly bred into this guy as he is sired by the proven carcass leader, HXC Patent 6608D. At a 6.4 frame he will add pounds and frame to your calves along with breed leading maternal traits. This package is hard to beat!

Lot 6: We feel Chappell Full Capacity N511 is one of the most complete bulls we have ever produced to date. He has jumped through all the hoops possible. He is at the very top of his contemporary group with over 100 ratios in every performance category. He comes from our famed Molly cow family that has produced more high selling bulls and females than any other in our herd. His dam produced Chappell Miss Molly M486, that sold to Pleasant View Farms, CT in our 2025 sale on her very first try. Chappell Full Capacity N511 has 15 EPD categories in the top 35% of the breed. The EPD profile is very impressive, and one might say “proven”, given the cow family he comes from. He has everything from the highest maternal and growth traits to unparalleled carcass merit. PLEASE NOTE! We are selling 50% possession on this bull as we are retaining him as our new herd bull. The buyer can take possession any time after June 15th. Please call with any questions you may have. We are looking forward to working with our new partner on this guy.

Lot 8: Let's start with the dam, 3SCC Millie H42, on this one. She is a bull making machine. We purchased her from Sonstegard Cattle Company where she topped the sale as an open heifer. Her first calf, named Chappell Meatmarket, was tremendous

and topped the sale going to Brian of Glienke, IA. In 2024, she had the second high seller, going to Barry Winter of Cogan Station, PA. In last year's sale, she had the high selling heifer, going to Gianna Homan of Centre Hall, Pa. The sire, Bieber Jumpstart J137, has been a breed impact sire producing high end cattle worldwide. This is the only Jumpstart sired bull available in this year's sale. Take advantage of the stacked and proven genetics behind this guy, he is a standout for sure.

Lot 9: This calf is a direct son out of PIE Hollywood 222's dam. This is the result of good ET work and studying pedigrees from our friends at Hillegas Red Angus. If you see CHAPP-HILL in this sale, you better look hard because you probably can't buy those genetics anywhere else in the country. The sire, PIE Herdsman 2012, is becoming one of the breeds leading sires and semen has been very limited. Chapp-Hill Cow Boss N11ET has 10 EPDs in the top 25% of the breed. He is a curve bender with low birth to top 2% growth. He has lots of milk (top 9%) and a Marb EPD of .79 (top 7%) and is dark red. We have him at a 5.8 frame with excellent feet and legs. Cow Boss is a serious herd bull prospect to consider for your next bull. A full brother sells as lot 25.

Lot 10: Chappell Wall Street N505 is a genetic masterpiece. His sire, Bieber CL Stockmarket, still leads the industry in the carcass category. His dam,

Chappell Miss Molly KE6, was our pick out of the K model ET calves. Those K model ETs have excelled from Koedam Red Angus in southwest MN to all over the northeast US. KE6 had a broken back in April 2025, so this bull was an orphan & was put in the ET pen at an early age. This will be your last opportunity to acquire genetics from any of the K model ET Molly's at Chappell Red Angus. Chappell Wall Street N505 has an unmatched EPD profile in this sale with top 1% ProS, GM, ADG, & Marb; top 2% YW & Stay; top 3% HB & WW. All that said, he has 11 EPDs in the top 14% of the breed and all in the right places! Take advantage of these breed leading genetics to improve all traits in your herd. Wall Street is a true herd bull prospect.

Lot 21: Chappell Stockmarket NE1 is another sleep all night calving ease bull with plenty of growth and lots of carcass built in along with the maternal

influence of the Robin cow family. He has the highest Marb ratio in the sale, which is no surprise being sired by Bieber CL Stockmarket E119.

Lot 22: Rare Sire - 5L 9 Mile Resonate 1113

Lot 22: Talk about a pedigree! This bull combines Tommy Jack, Final Product, Franchise and Energize into one package. Plus, the Dory

Jiba on the sire side no doubt goes back to Larson Red Angus genetics, which are some of the best

you will find for maternal traits. Chapp-MPKE Resonate 512 is a dark red bull with a lot of style and power. He will add grown and carcass traits to your calves.

Lot 24: Zara X Relentless X Quarterbak

Lot 24: In my opinion, Chappell Nickelback N516 has the best rear hip set in the sale, but you can be the judge. He does have the second largest REA in the sale at 1.29 inches per

100 pounds of body weight. This is the end of the

Zara era for Chappell Red Angus as we unexpectedly lost his dam this spring. What a shame, the Zara cow family was the leading maternal cow family for us going back to Whitley Red Angus in AL.

Lot 25: Hollywood's Dam X PIE Herdsman 2012

Lot 25: Chapp-Hill Wrangler N08ET has a genetic package that is second to none. His EPD profile is one of the best in the sale. He offers maternal traits with a top

19% ProS, top 6% CED, a -4.9 BW (top 7%), and a top 2% CEM; growth traits with a top 17% WW

, top 7% YW, and top 2% ADG; and carcass traits with top 20% Marb and top 22% REA. He is a heifer/cow sleep all night curve bending type bull with style and phenotype. A full brother sells as lot 9.

Chappell Liberty G404

Lot 31: You may never see this mating again as Bieber Hard Drive Y120 semen is almost nonexistent. Hard Drive has produced some of the best bulls and foundation females the breed has ever seen. We will be using some of these embryos in our program this year and can't wait to see the results. The dam, Chappell Liberty G404, is one of our herd changing females. She produced our 2025 lead off lot as a future flush selling to Ron Gilliland, Davis CA for \$5,250. She also produced this year's lot 2 bull, which has been our guest favorite all year. She produced a heifer selling to Pleasant View Farms in CT that had the highest selling bull in the NY Red Angus sale on her first calf. Chappell Liberty G404 has the proven carcass traits everyone is looking for: all 5 traits are in the top 5% of the breed! She also commands very high maternal & growth traits coming from the Molly cow family. Selling 3 embryos and providing the 4th as your guarantee. Embryos are stored at Trans Ova.

Lot 35: Chappell Showtime M489 was our 2025 high selling bull going to Hillegas Red Angus for \$18,000. To date, he may prove to be the best bull produced at Chappell Red Angus. We used him in our AI group last spring and have calves on the ground. So far, it looks like they have tremendous growth as they are blowing the doors off the competition. Showtime is a category 2 bull due to ineligible white, but none of his calves to date have any illegal white and have all calved unassisted.

Lot 36: Future Flush to any Cow in the Chappell Herd

Lot 36: This is a good opportunity for someone to tap into our genetics in a way we have never offered before. The only female excluded from this flush is the Lot 1 female in this sale, HRP Ruby 520-N5360. This will be an IVF flush at Trans Ova after the cow of your choice is confirmed bred this spring, which could be as early as the beginning of May 2026. You can flush one cow or pick two cows, and we can split the flush. You can choose the bull of your choice. All flush and semen expenses are buyer's responsibility. We are guaranteeing a minimum of 6 embryos. We are not retaining any embryos over 6 on a one cow flush, they are all yours. Below, is a sampling of our females and we will provide the buyer with a full list of all our female's registration numbers.

Lot 37: It's only fitting that we start the females with a MOLLY. Chappell Miss Molly N504 has 11 EPDs in the top 14% of the breed. She had a 60lb BW and exploded to a 1026 YW, she had excellent scan data with a 4.53 IMF & 11.26 REA. That's the way the Molly cow family performs every time. She excels in all the necessary traits to be a great cow, offering maternal, growth and carcass.

Lot 38: Welcome to the first females to sell from Hillegas Red Angus. They are partners with us on some high-profile females like Lot 1, 32 & 33. Todd & Rich have been here helping us groom cattle, photo cattle & video cattle every day possible, even taking vacation to make it happen. These heifers are some of the best & sought after genetics in the breed. They sell with the same guarantee as Chappell heifers. Todd's number is in the front cover of the sale book. Please give him a call, he loves to talk cows. Sired by Bieber Driven C540 and a FULL sibling to STRA Relentless, this heifer offers the best maternal genetics the breed has to offer.

TERMS & CONDITIONS

1. Terms of the sale are check or cash settlement. Every animal will be sold to the highest bidder. All settlements will be made with the clerks of the sale immediately following the conclusion of the sale and before any cattle will be released from the sale facility.
2. The auctioneer will settle any disputes as to bids, and his decision on such matters shall be final.
3. Any announcements from the seller on sale day will take precedence over printed material.
4. Health certificates will be furnished for shipment anywhere in the U.S.
5. A certificate of registry and transfer will be furnished for each animal sold, after settlement has been made.
6. Each animal becomes the risk of the purchaser as soon as it is sold.
7. All bulls have been evaluated and are guaranteed to be breeders.
8. All animals are guaranteed breeders by sellers. Any animal that has not proven itself as a breeder within six months after the date of sale, if in healthy condition, may be returned to seller at buyer's expense. The seller reserves the privilege of trying, for a period of six months, to prove the animal is a breeder. The seller, at his option, may either replace the animal with another of equal value or grant the buyer a credit for use on any cattle marketed seller in full settlement and transaction of all claims. Yearling bulls shall be guaranteed breeders for no more than 25 females. All animals are guaranteed to be breeders, with the exception of calves that are sold in cow/calf pairs.
9. Neither the owners, sale managers, clerks, nor anyone connected with the sale assumes responsibility, legal or otherwise, for damages of any kind. Any person attending the sale does so at his own risk.
10. The above terms and conditions shall constitute a contract between the buyer and seller of each animal sold.

Understanding EPD's as a selection tool.

Profitability and Sustainability (ProS): all-purpose index that predicts average economic differences in all segments in the beef supply chain. This index is a combination of the breeding objectives modeled in the HerdBuilder and GridMaster selection indexes. In this index, replacement heifers are retained from within the herd and all remaining progeny are fed out to slaughter and sold on a quality-based grid. Traits included in this index include calving ease, growth, HPG, STAY, Mature Weight, Dry Matter Intake and carcass traits. The resulting index is expressed in dollars per head born (Index/High Value).

HerdBuilder Index (HB): An index used to estimate difference in profitability for the sustainability of the cowherd. This index was created on the assumption that an operation raises its own replacement females and terminally markets the remainder of the calf crop on a quality based grid. Given that replacement heifers are retained, primary influence is placed on maternal traits such as Stay, HPG, and CE. MARB, YG and growth EPDs also impact this index, but to a lesser degree.

GridMaster (GM): An index used to estimate differences in profitability for those whose primary goal is to maximize profitability in the feedyard and on the rail. This index was created on the assumption that an operation markets all of the calf crop terminally on a quality based grid with no replacement females being raised. MARB, YG and growth EPDs are traits of primary importance in the index.

Calving Ease Direct (CED): Predicts the probability of calves being born unassisted from two year-old heifers. Selecting on actual birth weight is flawed; it is influenced by non-genetic factors such as nutrition and weather. While the BW EPD removes these non-genetic factors, the CED EPD is the best predictor of calving ease. CED includes variation in BW plus other influential genetic factors such as gestation length, calf shape, etc. The higher the CED EPD, the less calving difficulty.

Birth Weight (BW): Predicts the difference, in pounds, for birth weight, and is also used in the calculation of the CED EPD.

Weaning Weight (WW): Predicts the difference, in pounds, for weaning weight (adjusted to age of dam and a standard 205 days of age). This is an indicator of growth from birth to yearling.

Yearling Weight (YW): Predicts the expected difference, in pounds, for yearling weight (adjusted to 365 days of age). This is an indicator of growth from birth to yearling.

Average Daily Gain (ADG): Developed to more easily identify animals with favorable combinations of gain and intake. This will serve as a more intuitive measure of an animal's growth rate from weaning to a year of age.

Dry Matter Intake (DMI): Calculated using a multiple-trait model that includes DMI, On Test Average Daily Gain, Post Weaning Average Daily Gain and Weaning Weight.

Milk: Predicts the difference in maternal production of an individual animal's daughters as expressed by the weaning weight of their calves.

Maintenance Energy (ME): Predicts the differences in maintenance energy requirements of mature daughters of a bull. The lower the ME EPD, the less feed daughters require to maintain body condition.

Heifer Pregnancy (HPG): Predicts the probability of heifers conceiving to calve at two years of age.

Calving Ease Maternal (CEM): Predicts the probability of a given animal's daughters calving unassisted at two years of age.

Stayability (STAY): Predicts the probability of a bull's daughters remaining in the herd until at least six years of age. Females that don't stay in the herd that long are losing money, and they also contribute to higher rate of replacement females that the rancher can't cash crop.

Marbling (Marb): Predicts the difference for carcass marbling score as expressed in marbling score units. Higher marbling scores are positively correlated with higher carcass quality grades.

Yield Grade (YG): Marketing calves on a grid? Placing selection pressure on YG EPD will decrease the number of YG discounts on grid-marketed progeny.

Carcass Weight (CW): Selecting bulls with a high CW EPD will increase the weight of the hanging carcass, which directly impacts revenue.

Rib Eye Area (REA): Predicts difference of carcass Rib Eye Area between the 12th and 13th rib. Increase Rib Eye Area has a beneficial effect on Yield Grade which also includes Carcass Weight and Fat Thickness.

12th Rib Fat Thickness (FAT): Predicts difference for carcass fat depth over the 12th rib, as expressed in inches. Increases in fat thickness has a detrimental effect on Yield Grade.
